SUMMARY

Passionate software developer and team leader dedicated to best practices, collaboration, and technical excellence. I thrive in teamoriented environments, valuing clear communication and continuous learning. Skilled in mentoring, optimizing workflows, and driving scalable, maintainable solutions that deliver real impact.

EXPERIENCE

Squad Lead Software Developer

Derivco May 2022 - Present, Remote

- Techonologies: .Net Angular, React, Go, Gin, gRPC, REST, , PostgreSQL, MongoDB, Redis, Docker, Kubernetes, DevOps, Terraform, Kafka, RabbitMQ, AWS, Grafana, OpenTelemetry, Domain-Driven Design, Clean Architecture, Microservices
- Led cross-functional teams in developing and maintaining Golang, .Net, React and Angular applications, supporting thousands of users and ensuring system stability.
- Designed and deployed RESTfull APIs using Golang and .Net technologies, handling high-traffic data exchanges across distributed systems.
- Led cloud migration to Azure, optimizing App Services, Azure Functions, and Storage, reducing costs and improving performance.
- Established coding standards with S.O.L.I.D principles and Design Patterns, improving maintainability and reducing technical debt.
- · Mentored junior developers, conducting code reviews and knowledge-sharing sessions, enhancing team collaboration.
- Implemented DevOps best practices with Azure DevOps, Git workflows, and CI/CD pipelines, improving deployment efficiency and reliability.

Sr Full Stack Software Developer

Nearsure

March 2021 - October 2022, United States

- Developed and maintained enterprise-scale ReactJS, Angular, and .NET applications, leveraging C#, .NET Core, Web API, and Entity Framework
 Core for robust backend solutions.
- Implemented S.O.L.I.D principles and best coding practices, ensuring clean, maintainable, and scalable software architecture.
- · Designed and optimized relational databases with SQL and T-SQL, improving performance, data integrity, and reliability.
- Built reusable, modern UI components in ReactJS and Angular using TypeScript, HTML, and CSS, ensuring scalability and maintainability.
- · Worked in Agile (Scrum) environments, collaborating with cross-functional teams to deliver high-impact solutions on schedule.
- Managed CI/CD pipelines and version control using Azure DevOps and Git, streamlining deployments and development workflows.
- Optimized application state management with Redux (React) and NgRx (Angular), enhancing performance and responsiveness.

Sr Full Stack Software Developer

EvoPoint Solutions

December 2020 - April 2022, Puerto Rico

- Collaborated with analysts and designers to initiate and develop new software programs, applications, and tools that align with business goals.
- Wrote, translated, and coded software and prototypes according to detailed specifications, ensuring robust program logic and data processing while resolving errors.
- Oversaw quality assurance efforts by running performance tests on new and existing software, debugging issues, and identifying areas for improvement.
- Designed interactive tools for internal and external use, including platforms for reporting, data manipulation, and user engagement.
- · Administered diagnostic analyses of test results and implemented solutions to critical issues, enhancing overall system reliability.
- Developed and maintained comprehensive user manuals and guidelines, and refined programming scripts to improve the functionality and appearance of company websites and web applications.
- Led business process automation initiatives and conducted research on emerging software products.

• Worked closely with Business Analysts, Software Engineers, and key stakeholders to understand requirements and deliver optimal software and technology solutions.

Full stack Software Developer

Eaton

August 2017 - October 2021, Remote

- Developed and tested applications using .NET and Node.js, ensuring quality and scalability throughout the Software Development Life Cycle (SDLC).
- Led analysis, design, and implementation of new features, enhancements, and testing strategies to meet evolving business needs.
- Provided technical solutions for Latin and North America regions under the ADQS CoE framework, ensuring adherence to standard IT processes.
- Managed incident resolution, prioritizing high-impact tickets and collaborating with IT support teams and stakeholders to ensure effective fixes and minimal downtime.
- Optimized and maintained plant application systems across Latin and North America, proactively identifying and addressing areas for improvement.
- Executed ITSM processes (Change, Request, Incident, and Problem Management) at the task level to enhance system stability and reliability.

External Software Developer Consultant

Overlogy SRL

February 2016 - August 2021, Remote

- Developed and maintained web applications using Angular, Vue.js, and .NET, specifically for fuel station management, ensuring efficiency and scalability.
- Designed and maintained Windows applications for fuel station operations using Windows Forms, Entity Framework, and MySQL, optimizing business processes.
- Developed and maintained full-stack applications with Node.js and Angular, improving system responsiveness and user experience.
- Implemented SignalR to enable real-time communication between multiple devices, enhancing system interactivity and responsiveness.

Full Stack Software Developer

Castillo Software Solutions

March 2016 - August 2017, Dominican Republic

- Led development and maintenance of web and desktop applications using .NET (MVC, Web API), Angular 2, and SignalR, ensuring scalable and high-performance solutions.
- Implemented SOLID principles and Clean Code, improving software maintainability and long-term scalability.
- Managed Web API development with ASP.NET Web API and Entity Framework (Code First) to optimize data exchange and persistence.
- Oversaw version control and CI/CD deployments using Git, BitBucket, and Azure DevOps, streamlining release cycles.
- Led task and project management using JIRA, ensuring efficient workflows and delivery in Agile environments.
- Developed and optimized SQL Server databases, ensuring data integrity, high availability, and performance.
- Technologies & Design Patterns:
- .NET (MVC, Web API), Angular 2, SignalR, SQL Server, Entity Framework (Code First), Git, JIRA, BitBucket, CI/CD, Design Patterns (IoC, Dependency Injection, Repository, Unit of Work, Proxy, Factory).

Web Developer

Dominican Republic Parlament

August 2015 - December 2015, Dominican Republic

- Maintained and enhanced a .NET (ASPX) website, ensuring stability, security, and optimal performance for business operations.
- Supported and optimized enterprise applications built with ASP.NET MVC, Entity Framework, jQuery, and Bootstrap, improving functionality and user experience.
- Troubleshot and resolved production issues, minimizing downtime and ensuring system reliability.
- Implemented performance improvements and best practices to enhance application efficiency and scalability.

EDUCATION

Bachelor's degree, Computer Science

Universidad Autónoma de Santo Domingo • 2016

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals Microsoft • 2023
